Group Project - Mechanics

1. Organize

Form groups of 5-6 students.

2. Communicate

Create a group chat in your preferred messenger.

3. Assign Roles

Define responsibilities: PM, Dev, QA, Business Analyst, and Solution Architect.

4. Requirements

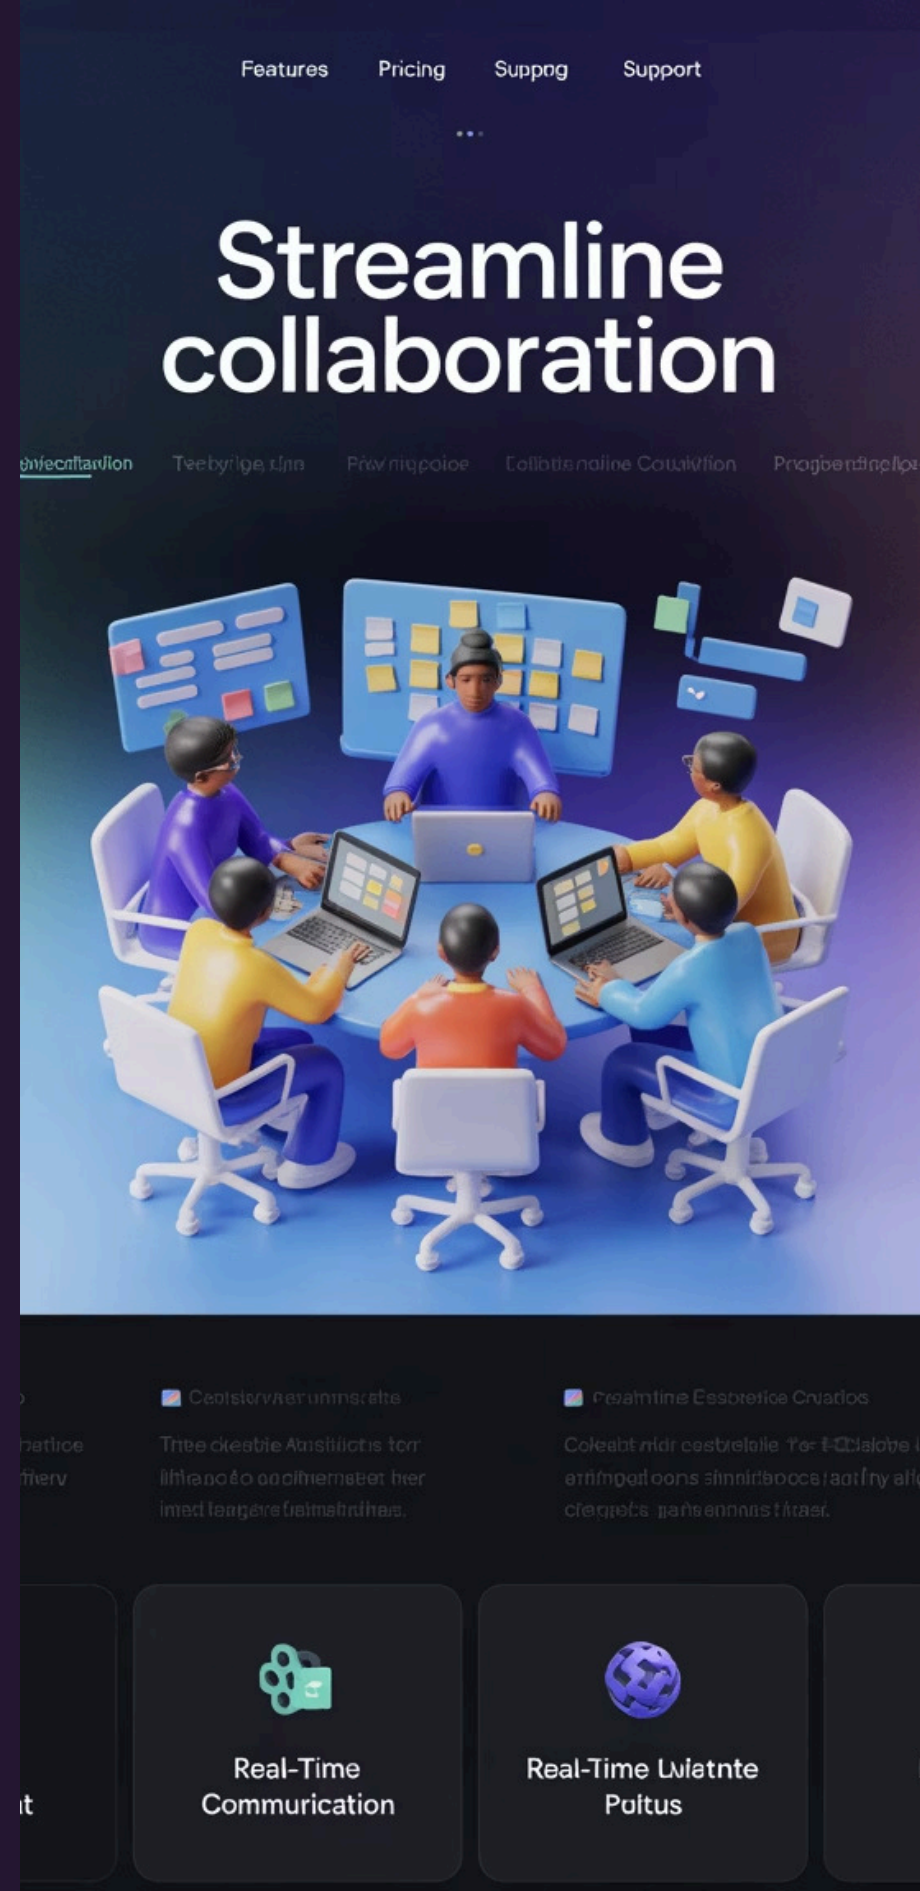

Contact your client to collect initial project requirements.

5. Execution

Collaborate and execute the core project work.

6. Demo

Present the final project and all related artifacts.

Project Management Process

01

Initiation

- Analyze stakeholders & prepare stakeholders matrix
- Analyze business case
- Prepare project charter or proposal

02

Planning

- Collect requirements & define scope
- Prepare schedule
- Prepare cost baseline
- Prepare Risk Register
- Prepare Quality Management Plan
- Prepare Communication Management Plan
- Define lifecycle type (predictive vs adaptive)

03

Execution

- Prepare a product prototype (Vibecoding tools or Draftium)

04

Monitoring & Control

- Present/Demonstrate results to stakeholders

05

Closure

- Present results & receive stakeholder approval
- Conduct post-mortem & identify lessons learned

Deliverables

- Project Charter or Proposal
- Stakeholders Matrix
- Project Lifecycle Visualization

- Scope Baseline (WBS, Backlog, User Stories)
- Schedule Baseline (Gantt, network diagram)
- Cost Baseline (estimates, reserves)

- Risk Register
- Communication Management Plan
- Jira Workflow
- Prototype
- Lessons Learned

Available Project Topics

Choose one of the following topics for your group project:

Commentator's School

Educational platform development for sports commentary training and certification.

Slobidskyi District Website

Community portal for local government services and citizen engagement.

Shoe Factory E-Commerce

Online retail platform with inventory management and customer portal.

Charity Fund "Study, my Buddy"

Non-profit organization website with donation tracking and volunteer coordination.
